Microsoft Dynamics Developer Needed

We are seeking a skilled Microsoft Dynamics Engineer with expertise in developing marketplace applications. As part of our team, you will be responsible for designing, implementing, and maintaining applications that integrate with the Microsoft Dynamics platform. Your primary focus will be on developing marketplace solutions that extend the functionality of the core Dynamics system to support integration with the Sparo platform. This role requires a strong understanding of the Dynamics ecosystem, along with proficiency in programming languages and tools commonly used in application development. The successful candidate will be responsible for the development and maintenance of various web applications related to Sparo's Philanthropy as a Service (PHAAS) and must be able to work in a fast-paced environment.

About Sparo

Sparo (www.sparo.com) provides a suite of corporate social responsibility services for companies to democratize their giving programs. We are improving the lives of everyone worldwide by enabling consumers around the globe to select the charities where corporate donations fund. Our vision is to help fund every cause, charity, researcher, or other organization focused on the betterment of humanity by intertwining them with e-commerce and corporate social responsibility. Sparo's lead product is an ecommerce plugin to enable online shoppers to select a charity to which the merchant donates a percentage of the sales value of the shopping cart.

Job Responsibilities

- Participate in the development of web applications using Microsoft Dynamics, React and other relevant technologies.

- Write clean, maintainable, and efficient code.

- Collaborate with cross-functional teams to identify and solve problems.

- Develop and maintain technical documentation.

- Stay up-to-date with emerging technologies and trends in web development and e-commerce.

Qualifications / Skills Requirements

- Experience with Microsoft Dynamics, JavaScript, HTML, CSS, and RESTful APIs.

- Strong knowledge of Microsoft Dynamics and its concepts.

- Familiarity with back-end development technologies such as Node.js (Express), Laravel, or Ruby on Rails is helpful but not required.

- Ability to work in a fast-paced environment and manage multiple projects simultaneously.

- Strong problem-solving skills and attention to detail.

- Excellent verbal and written communication skills.

This is a fantastic opportunity for a Microsoft Dynamics developer looking to take their skills to the next level and work on challenging projects. If you have a passion for Web development and are eager to learn and grow, we would love to hear from you.
